

Scandia Natural Gas and Propane (LP) Gas-Fired Sauna Heaters

Considered the finest sauna heater in the world, the Scandia Ultra gas sauna heater is made from 100% stainless steel and features an extra large rock tray that instantly transforms the sauna into a steam sauna. More efficient than traditional electric heaters, the Ultra gas sauna heater does not require continuous replacement of costly elements.

Ultra-Sauna gas heaters come complete with a galvanized back-panel assembly, stainless steel internal wall flashing and a flu-cap or draft hood (for direct or vertical venting). The ultra-sauna comes standard with a 60 minute timer and a mechanical thermostat. Optional items include a 24-hour timer and a battery powered peizo ignition system.
